

BAREM test inițial clasa a X-a (modelul 2)

I. 4·0,5p = 2p

1. c

2. c

3. c

4. d

II. 14·0,2p = 2,8p

A

1) $1s^2 2s^2 2p^5$

2) perioada a 2 a; grupa a VII-a A; blocul p

3) 1

4)

5) nemetal

B

1) $1s^2 2s^2 2p^6 3s^2 3p^6 4s^1$

2) perioada a 4 a; grupa a I A; blocul s

3) 1

4)

5) metal

III. 5·0,4p = 2p

1. c

2. d

3. a

4. e

5. b

IV. raționament corect - 1,2p, calcul matematic - 1p

$$m_{s1} = 60g$$

$$c_1 = 30\% \rightarrow m_{d1} = \frac{m_{s1} \cdot c_1}{100} = \frac{60 \cdot 30}{100} = 18g$$

$$m_{s2} = 20g$$

$$c_2 = 20\% \rightarrow m_{d2} = \frac{m_{s2} \cdot c_2}{100} = \frac{20 \cdot 20}{100} = 4g$$

$$\rho = \frac{m}{V} \rightarrow m = \rho \cdot V = 100g$$

$$m_{d \text{ final}} = m_{d1} + m_{d2} = 18 + 4 = 22g$$

$$m_{s \text{ final}} = m_{s1} + m_{s2} + m_{apa} = 60 + 20 + 100 = 180g$$

$$c_{\text{final}} = \frac{m_{d \text{ final}}}{m_{s \text{ final}}} \cdot 100 = \frac{22}{180} \cdot 100 = 12,22\%$$
